Edition 2023

# QUANTUM GLOBAL PATENT, PUBLICATIONS AND NEWS DATABASE

## YOUR CHALLENGE

The patent & licensing landscape within QUANTUM technologies is currently showing a dynamic increase.

How can you stay on top and easily search, identify, analyze and navigate through

- the ever increasing number of patent families ?
- a huge number of publications on QUANTUM Technologies ?
- the increasing news flow ?

## OUR SOLUTION

We propose a comprehensive, reliable, accurate and cost-effective QUANTUM patent, publication & news database that provides you with all the intelligence around QUANTUM technologies.

- One-time delivery or a semestrial or yearly subscription
- Monthly updates
- Patent multi-categorization and multi-source feeds
- Zooms / Deep dives per application (e.g., Quantum Processors, Quantum Encryption, Quantum Dot Devices, Topological Insulators), per region or per technology
- Easily cross-check & integrate into your own QUANTUM search & analysis
- Optional customized consultancy services from our QUANTUM Tech experts

## COVERAGE & METHODOLOGY

Monthly collection, scientifically analyzing and categorizing the increasing amount of patent families and scientific publications.
