

Relevance Identification

Fully automated process
hosted in one place

Patent, NPL, Web, internal documents

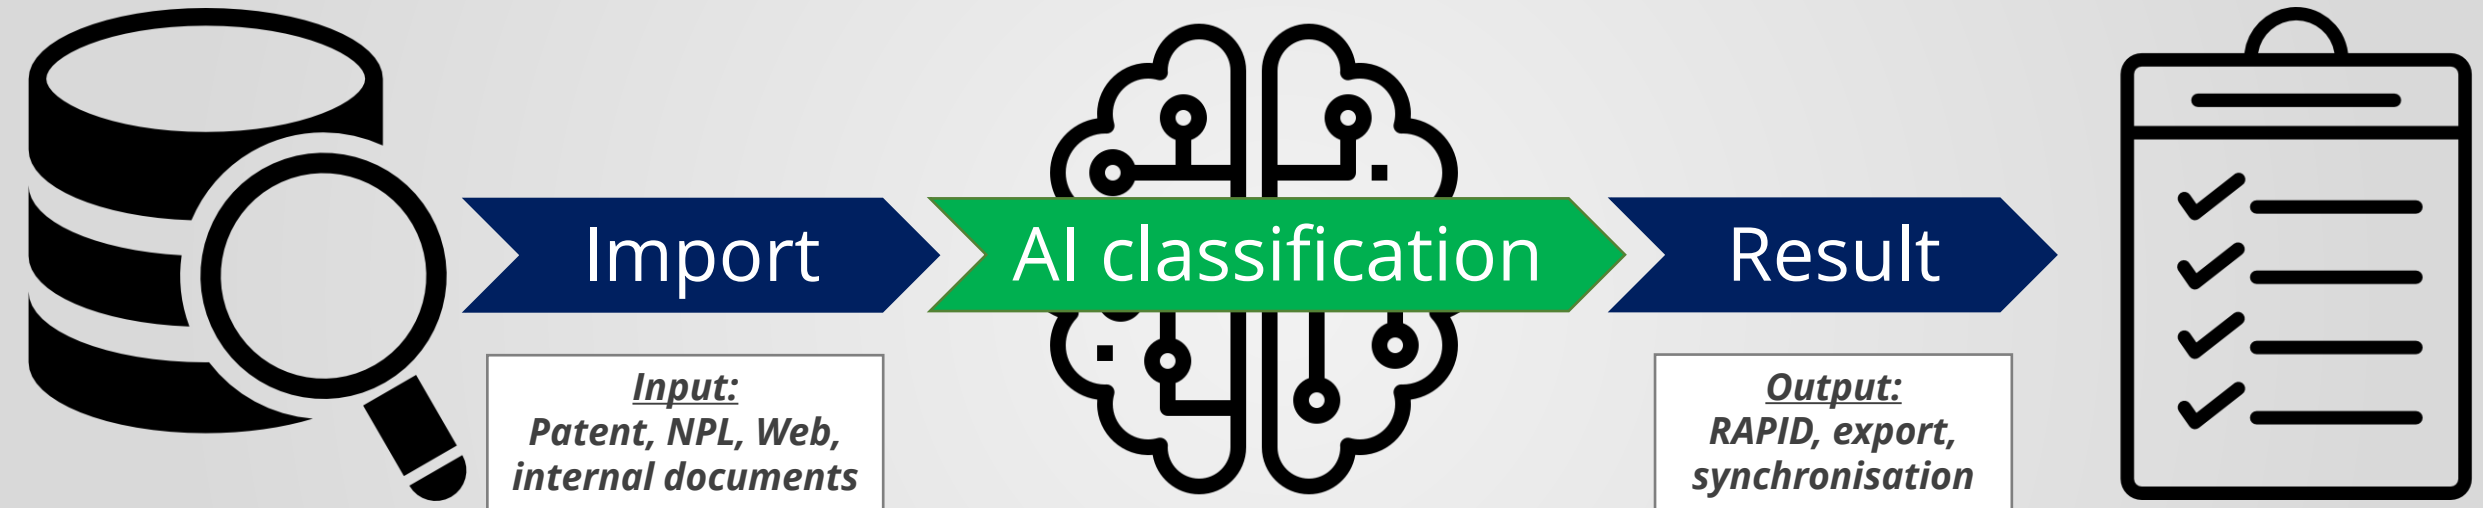

Import

Classification

Restitution

Experts focus on the result

 **SmartCat**

**Free yourself from doing repetitive tasks
Focus on what's most matter: the result**

1. Provide a training set
2. Set the AI classifier

3. Run the learning process
4. Validate the prediction model

AI Learning

AI Classification

5. Run the classification process

6. Validate the AI classification

>80%

Relevance rate estimated for each of the 3 monitoring processes implemented

~3

Number of iterations done before reaching a suitable relevance rate

4 min

Time to multi-classify 1000 documents

We did it !
